The following question was submitted regarding the bid listed above:

1. On page one, it states that the proposed service agreement service area is expected to cover most of the 5,942 unincorporated housing units. Has the Township removed homes covered by HOAs?

Lockport Township has counted all unincorporated units in the township and stated on the front cover of the RFP 5,942 units appear to exist. In Section 11 of the RFP, it states that several groups are not included in the estimated total of units to be serviced when this contract begins. They include two Carillon subdivisions that currently contract through their Homeowners Associations and Bonnie Brae subdivision which is currently included in the City of Lockport's contract. The RFP will calculate the overall cost of service based on 3,000 homes.
